

LEGE-CC Terms of Use

By accessing content from the Blue Biotechnology and Ecotoxicology Culture Collection, including but not limited to all data, documents, website content and material, the user accepts and agrees to follow these Terms of Use:

- 1- Intellectual Property:** All materials provided to you by LEGE Culture Collection — embracing, but not limited to, original data, text, images, audio, video, data, and software presented in multimedia formats and live culture material — are the intellectual property of CIIMAR – Interdisciplinary Centre of Marine and Environmental Research. CIIMAR retains all rights to the Content, including copyrights, except where copyrights or other proprietary rights are held by other individuals or entities, either exclusively or collaboratively with CIIMAR. If any data or content made available by LEGE-CC is not eligible for copyright protection, the user access to such content is contingent upon acceptance of the terms of this “User Agreement”, including the usage restrictions specified below.
- 2- Limited General License:** The user is prohibited from reproducing, distributing, displaying, performing, or using the Content in any manner except for legitimate, noncommercial educational or research purposes ("MTA"). Any copying or redistribution of LEGE-CC Content for commercial purposes, including commercial publication or personal gain, is strictly forbidden without explicit written consent. When engaging in an Internal requisition/Order form or MTA, the user agrees to cite properly the **LEGE strain number(s)** in all publications or patent applications and to acknowledge the **LEGE culture collection** as the source of the strains. Users/customers are kindly requested to inform us of any publication including **LEGE strains**.

If the Content is sourced from the LEGE-CC website, the user must also include the website's URL. Similarly, for Content obtained from the LEGE-CC Arctos database, the user must reference the database URL.

This agreement covers LEGE-CC content sourced from Arctos as well as secondary biodiversity information sources such as NCBI, or other. Records from these secondary sources are suitable for data discovery, but should be verified against the LEGE-CC Arctos database, or LEGE-CC website database which contains the most updated information.

- 3- Disclaimer of Warranties/Limitation of Liability:** LEGE-CC provides the data Content free of charge and disclaims all warranties to the fullest extent permitted by law, including express, implied, or other warranties regarding the Content, such as implied warranties of merchantability, fitness for a particular purpose, and noninfringement. Accessing LEGE-CC Content and/or the website is at your own risk. LEGE-CC, CIIMAR, its affiliates, agents, officers, directors, or employees shall not be liable for any damages arising from your access to the Content and/or the website, whether in contract, tort, or otherwise.
- 4- Indemnification:** The user agrees to compensate and hold LEGE-CC and its affiliates, agents, officers, directors, and employees harmless from any and all liabilities, losses, claims, damages, costs, and actions (including attorneys' fees) arising from the users benefits of the Content, the LEGE-CC website, the LEGE-CC database, or the LEGE culture collection.

By ordering strains from LEGE, the user/customer agrees to not resell, borrow, transfer, or give our strains to third parties.

Send us an expression of interest by using the contact form in the online-database or through our email.

Before the supply of strain cultures from the LEGE culture collection, the user/customer shall complete and sign an Order Form and a Material Transfer Agreement.
